RE: CLINICAL AND LABOLATORY REPORT

This is to certify that I have carried out clinical and laboratory examination on Michael Work's dogs currently residing in Buziga Kampala. The dogs are traveling to Selkirk NY, USA on the 5th March, 2011. All the necessary vaccinations including rabies (Rabisin L358875) have been done. The dogs have been on regular/routine treatment for control of intestinal, lung and heartworms as well as skin parasites. The dogs are in good condition and therefore you may authorize their travel.

The description of the dog is elaborated below.

Name	Microchip No.	Breed	Sex	Age/Date of Birth	Color
Refuge	 968000005272264	Basenji	Female	12 Weeks	Brown and white
Dot	 968000005414654	Basenji	Female	10 Weeks	Black and white with light brown dots
Ikui	 968000005322872	Basenji	Male	10 Weeks	Sable and white
Sister	 968000005255962	Basenji	Female	10 Weeks	Brown and white

Place: **Kampala**

Date: **03 March 2010**
