

Application for Submitting Native Stock

Dog's name Ntomba Mobengi

Owner(s) James E Johannes

Date imported March 5, 2010 Proof of Origin must be provided with application.

Importer(s) James E Johannes, Lisa Saban, Bryan and Laurie Gregory

Actual area imported from (area found in Africa) GPS - 0.57982 N, 20.97975 E (DD WGS 84)

Bokolekila, Equateur Province, Democratic Republic of the Congo

Dam (if known) unknown Color Red and White

Age at this time 22 months Weight 22 lbs

Height (ground to top of shoulder) 16" Length (sternum to rear extension of hip) 17"

Provide Photographs: The required 3 photographs must be in color and show full body (from ears to feet): 1) front on, 2) left side and 3) right side. These are the photos as required by AKC and they will be used when the dogs are to be registered. There will be NO exceptions regarding the photos. See <http://www.basenji.org/NativeStock/Application/Photos.htm> before preparing your photos.

Note: A short description of dog is to be attached to this application or be on the reverse of this page.

Health Testing: Dog must be permanently identified by tattoo or microchip.

Give tattoo _____ or chip number 4B66465A2D

Health Testing Results Completed (HA and Fanconi required – more tests will help in decisions):

CERF normal OFA hips good (prelim) OFA patella normal

Fanconi marker test clear - normal HA test clear Thyroid test normal

Has dog produced puppies Yes ☐ No ☒ Mated with _____

Number of puppies born _____. If more litters repeat this section on reverse or additional page to include all offspring.

Enclose pictures of mate and all offspring. Photos must be at least one clear side view of entire dog.

AKC Basenji Judge Evaluator William R. Russell

AKC Basenji Breeder Judge Evaluator Kathy R. Britton

Basenji Breeder Evaluator Rita L. Webb

Fee of \$50 made payable to BCOA. Mail application, required 3 photos and fee to: Pam Geoffroy, 197 Mt. Hope St, North Attleboro, MA 02760. Fee is not refundable. This form due on December 1.

If your dog fails to get a rating of Fair or above or you fail to show up to your designated evaluation, you will have one chance to reapply and pay an additional fee of \$50.

Ntomba Mobengi

Imported March 5, 2010

DESCRIPTION ACCOMPANYING BCOA APPLICATION FOR SUBMITTING NATIVE STOCK

Bengi was found in the hunting and farming village of Bokelekila (Bokele) in the DRC, which is 7km inland and east of the Maringa River, by Kajju. Kajju is a Lomako Reserve Park Guard we asked to find Basenjis for us while we were in the Reserve. He selected seven puppies. Bengi was one of three we chose from this group. Mobengi means hunter in Lingala. Ntomba is the name of the Mongo people who live along the Maringa river between Basankusu and Djolu.

What drew me to Bengi when I first saw him was his head. He had such nice almond shaped eyes, dark eye rims and nose. Nicely hooded ears with good wrinkling between them when he has his ears up. He has correct proportion between the muzzle and skull and both are level with the other. He originally had only masking on his muzzle but when he started losing his puppy coat then masking on his forehead became more apparent. Teeth even with scissors bite. Now that he is near two years in age his size and weight is the same as a female according to the standard. His appearance though says, here is a male! He is slightly longer than tall. He has white feet, chest, and some white hairs on the tip of his tail. His coat is short with no undercoat and covers a pliant skin. His coat color is light but a genetic coat color test performed by Vetgen determined he was Ay/at, a tri factored red. His tail has dark marking on it also indicating he is tri factored and is set high. Neck is of good length and descends into a chest with good width. Level top line. Good moderate laid back shoulder with fine straight legs supported by small compact oval feet with well arched toes. Hindquarters are well muscled and moderately angulated with good length of second thigh.

His temperament is not aloof at all. He is not shy at approaching people but will focus more on a dog than humans if one is with them. He is friendly with most dogs except intact males. If he meets someone he has come to know and really like, then he greets them with a baroo and a furiously wagging tail. He has displayed some of the traits of the Basenji, like licking people and dogs dry if they are wet and not liking to get wet or walking on wet grass. The few times he has had a chance to do practice lure coursing he has shown intensity and drive to follow the lure. At home he also has shown his interest in hunting by trying to go after the squirrels who go along the fence. We have come to call him the Little Napoleon because he has now thinks he is almost the top male dog in the pack.

RADIOGRAPHIC EVALUATION OF PELVIC PHENOTYPE WITH RESPECT TO HIP DYSPLASIA

* The study must be repeated when the animal is 24 months of age or older to qualify for an OFA number.

- _____ **EXCELLENT HIP JOINT CONFORMATION***
superior hip joint conformation as compared with other
individuals of the same breed and age
- ✓ _____ **GOOD HIP JOINT CONFORMATION***
well formed hip joint conformation as compared with other
individuals of the same breed and age
- _____ **FAIR HIP JOINT CONFORMATION***
minor irregularities of the hip joint conformation as compared
with other individuals of the same breed and age

- _____ **BORDERLINE HIP JOINT CONFORMATION**
marginal hip joint conformation of indeterminate status with
respect to hip dysplasia at this time – Repeat study in six
months
- _____ **MILD HIP DYSPLASIA**
radiographic evidence of minor dysplastic changes of the hip
joints
- _____ **MODERATE HIP DYSPLASIA**
well defined radiographic evidence of dysplastic changes of
the hip joints
- _____ **SEVERE HIP DYSPLASIA**
radiographic evidence of marked dysplastic changes of the
hip joints
